In accordance with NAC 445B.3477, this notice announces a 30-day public participation and comment period for this proposed action. Comments and inquiry on the Draft Permit will be accepted through April 25, 2012. A public hearing will also be held on **Wednesday, April 25, 2012 at 10:00 AM** at the following location:

The NDEP/BAPC has conducted analyses and air modeling evaluations to develop limits and conditions for these types of temporary sources that are determined to be protective of the Nevada Ambient Air Quality Standards (NAC 445B.22097). The Draft Permit specifies daily emission limits for criteria pollutants that will be achieved by limiting the production and hours of operation at proposed sites. The Draft Permit also mandates specified pollution control equipment and measures for all applicable sources.
